Best phone number to reach inspector: Contact EPA RPM (Ron Naman) – 212-637-4375

Do conditions at the site pose an immediate threat to human health or the environment?

☐ Yes ☒ No

If Yes, please provide a brief description of the conditions and the necessary response actions:

Briefly describe any equipment damage, operational problems, etc.: (E-mail note to State of NJ from contractor – EPA copied on e-mail) There were no new discharges, conditions, and/or new potential impacts to receptors identified related to the storm event. The DTP system was just reactivated 11/5/12 after the vaults were pumped. So it was off basically for one week from last Monday night until this morning.
